Export Control - Customer Information

Dear valued customer,

We often receive the question: “Which export control regulations have to be regarded while exporting Kollmorgen products”

This question is generally answered by our General Terms and Conditions of Sales, specifically in the section:

EXPORT RESTRICTIONS

The Customer shall not export, re-export or transfer, directly or indirectly, any Products or technical data received from Seller to any country or user where such export, re-export or transfer is restricted, either by the laws applicable to this contract (laws of Seller’s country), the laws of Customer’s country or by the laws of the United States of America, without first obtaining any required governmental or similar license, authorization, certification or approval. If the Customer resells or otherwise disposes of any Products or technical data purchased hereunder, it will comply with any export restrictions applicable.

Kollmorgen supports its customers with the information about the HTS code, the Country of Origin and the Export Control Classification of the goods on Seller’s quotation or order acknowledgment documents so that exporter has all information on hand to determine license requirements.

If you need additional information to support your export case, please contact us.

Thank you very much.

Sincerely

Your Kollmorgen team
