

Product KSM 100-2-CN

Measurements in mm (h.x.d.x.w): 100x115x135

Description

Open programmable safe PLC for machinery and plant construction. The modules can be enhanced up to 130 safe I/O's and / or up to 12 axes.
The basic module KSM100-2-CN supplies 20 safe I/O's, 14 safe inputs and 3 safe cut off channels as well as a memory card slot for easy program and configuration change. option: fieldbus interface can be integrated.

The continuous function chart oriented programming frame SafePLC allows an easy and comfortable implementation of safety related tasks. The firmware of modules offers an comprehensive library for standard functions for safe signal preprocessing of safety related sensors and actors as well as for practical technology functions especially for safe motion of drives.

The spectrum of the modules reaches from conventional safe logic processing through simple safe speed monitoring tasks of single axes up to complex safe more dimensional speed- and range / zone monitoring in multiple axes processing.

The CANopen communication device used to exchange non safe data between KSM modular device and non-safe control systems. The configuration of the non-safe data via SafePLC of modular device. The device must be parameterized as a CANopen slave device.

- 20 safe I/O's configurable as input or output, 14 safe inputs, 3 cut off channels, thereof 1 safe relay output and 2 messaging outputs in the basic module
- Expandable up to 130 safe I/O's, and / or 12 safe axes via backplane bus (connectors to snap on head rail)
- Integrated fieldbus interface (CANopen)
- CFC oriented programming with SafePLC - Software
- Comprehensive library with pre-configured safety related sensors and actors
- Complete speed- ad position-oriented safety functions for safe motion according to EN 61800-5-2
- Dimensional functions for safe speed- and range / zone monitoring possible
- Parameter administration for expansion modules in the basic module
- Cross circuit monitoring
- Comprehensive diagnostics integrated in firmware
- Coded status display using a 7-segment display and LED's mounted in the front side
- Quit-/Start-/Reset- button in front side

KSM 100-2-CN - I/O overview

Quantity	I/O s
14	digital inputs
20	digital inputs/outputs
2	pulse outputs
2	digital outputs relays
2	digital outputs LOSIDE
2	digital outputs HISIDE
6	messaging outputs
1	memory card
1	CANopen
