Installing the motor

1. Mounting
   - Mount the motor tightly against a metal surface with good thermal conductivity, such as aluminum or steel.
   - Secure the motor firmly using hexagonal socket screws and nuts or an equivalent method.
2. Alignment of the load
   - When connecting the load to the shaft, assure that the longitudinal axes of both load and shaft are aligned. Use of a flexible coupling or similar device is recommended.

   - When machining the motor shaft, or connecting it to a pulley or other device, do not subject to shaft to a thrust load, overhanging load or shock.

CAUTION

1. Do not disassemble the motor, drop it or subject it to shock
   - Disassembly results in a considerable reduction in motor performance. Dropping it or subjecting it to shock may cause internal damage. Any of the above conditions may void the warranty.
2. Do not subject the motor to any of the following conditions:
   - Locations where strong vibrations or shock occur
   - Dusty locations (unless IP65)
   - Locations where water, oil or other liquids are likely to come in contact with the motor (unless IP65)
   - Locations where the ambient temerature is outside the permissible temperature range of -20°C (-4°F) to +40°C (+104°F)
3. Temperature rise
   - The temperature of the motor's outer surface should not exceed +140°C (+284°F).

Warranty Policy / Return Authorization

1. Pacific Scientific warrants motor to be free from defects in material and workmanship for two years from the date of manufacture as determined by the date code on the product label. The warranty does not include damage resulting from misapplication, or damage resulting from abuse, overload or overheat conditions, or from failure to provide adequate maintenance.

2. Prior to returning any products for repair, authorization must first be received from the Danaher Motion Customer Support Group (Phone 815-226-3100, Fax 815-226-3148). The Customer Support Group will issue a Return Material Authorization number which must be referenced on the packing slip and on the outside of the shipping container of the returned product(s). Returns without a valid Return Material Authorization number will not be accepted.
